A Level's

The Main Things I need to Know

1. I will need 5 GCSE's at A* to C grades (Including Maths and English)
2. Some colleges may require B grades for certain subjects.
3. I would normally have to study 3 or 4 subjects.
4. It is better to have studied my chosen A Level subjects at GCSE
5. A Level's are mainly assessed by examinations.

Things I should think about

1. What are my career aspirations and do I need to study a specific A-level subject? (e.g. I will need science A-levels for medicine)
2. Do I perform well in exams or am I stronger on coursework and projects?
3. If I am awaiting my GCSE grades, have I got a backup plan just in case I do not get 5 GCSE's at A* to C in the subjects I need?
